Device

## Do's and dont's

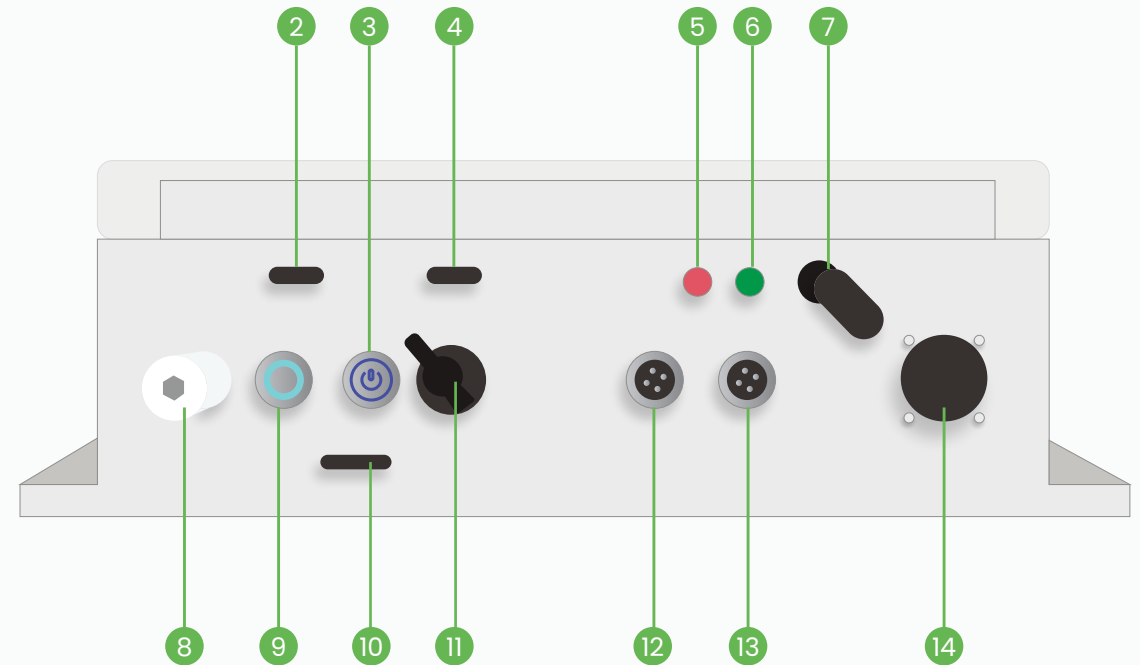

- 1 Set up the monitor in an area with good air circulation and avoid direct airflow outlets like vents, windows etc.
- 2 Always use the power adapter that comes with the device to ensure compatibility and internal components damage prevention.
- 3 Don't blow directly on the sensor outlets because it can inaccurate readings and potentially damage sensitive sensors.
- 4 Never covers the air inlet of the monitor which can affect the accurate air sampling.

# Connecting the monitor

---

Effortlessly add your air quality monitoring device to the app for uninterrupted access to real-time air quality data.

- 1 Connect the device to a **DC power** source to provide the power supply.

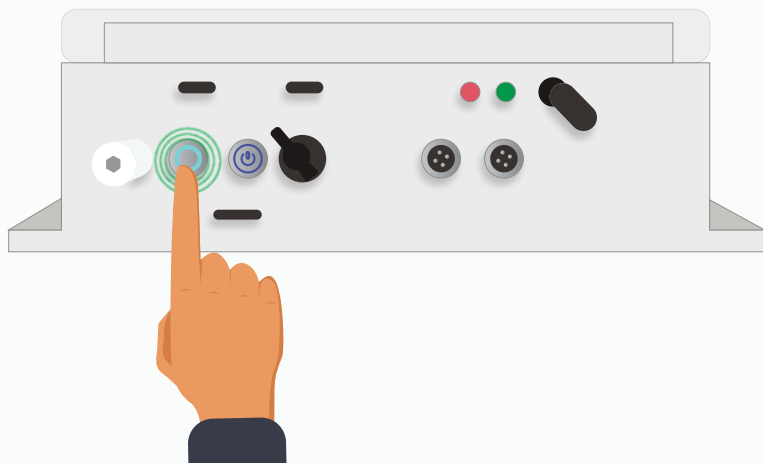

- 2 Press the **Power button (PWR)** from the downside to turn on the device.

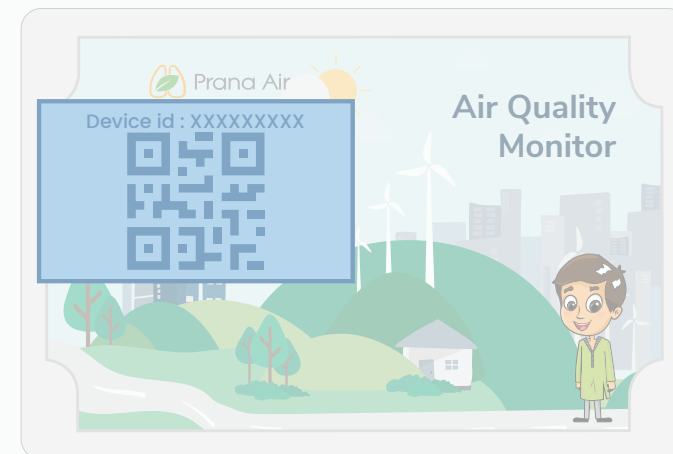

- 3 Once the device is powered on, press the **Mode button**.

Note: Press the Mode button only once. Avoid pressing it again because it will switch the device back to Wi-Fi configuration mode.

- 4 A **QR code** and **Device ID** will show on the device screen. Scan the QR code and restart the device.

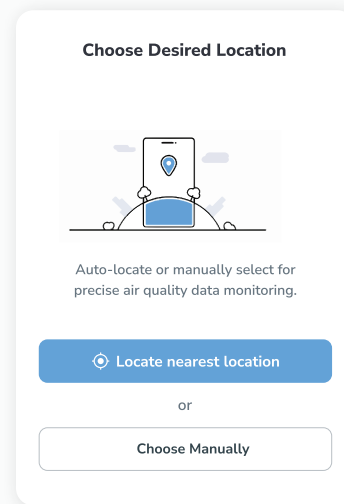

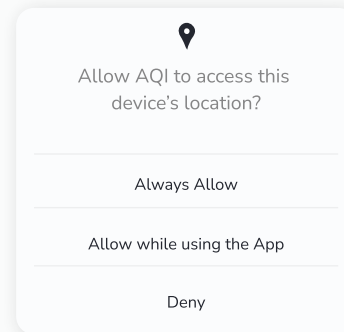

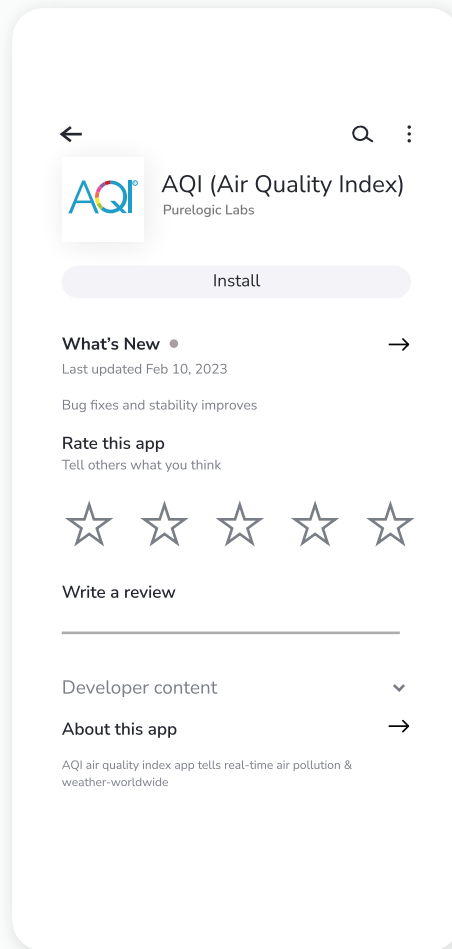

# Adding the Monitor in the AQI APP

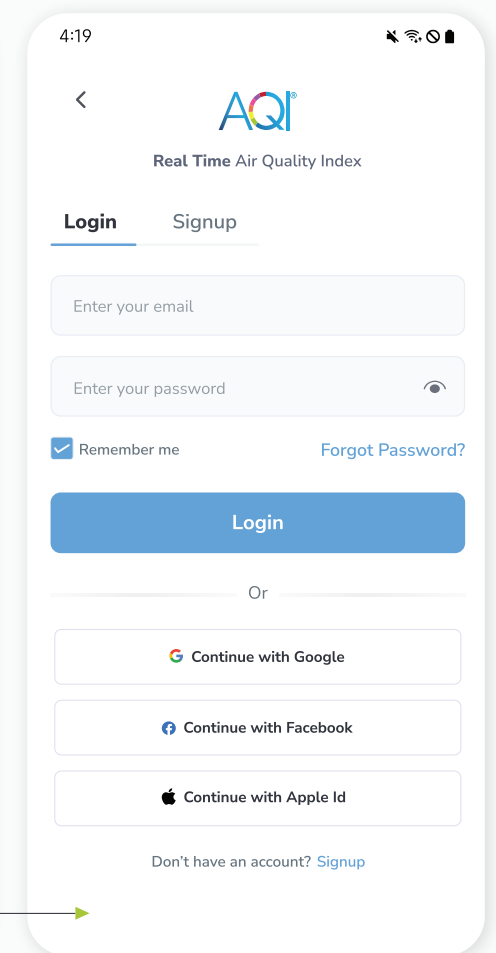

---

Proceed to integrate the monitor with the app after successfully establishing the network connection. Follow these steps to add the monitor to the app and access remote data viewing.

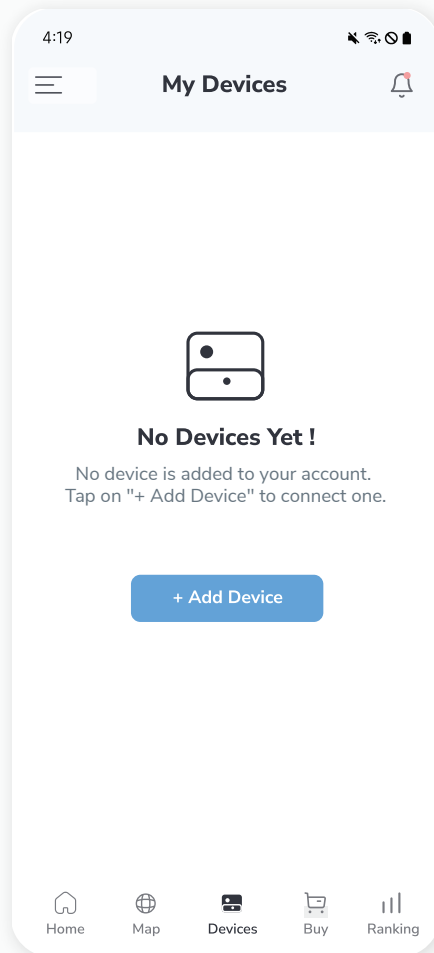

1 Download and install the **AQI App** on your phone (available on Google Play Store for Android and the App Store for iOS). After installing, open the app and allow all the necessary permissions.

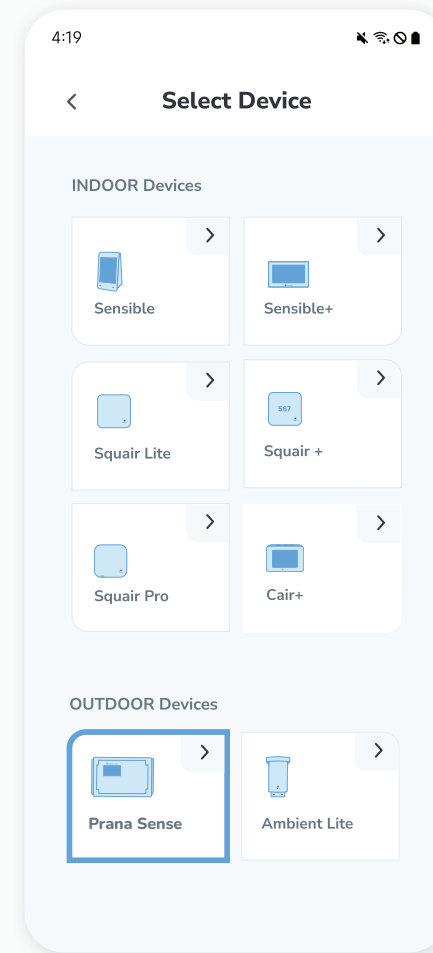

2 Then, Click on "Devices" icon showing in the bottom of home screen. Then **Sign up** to create your account or **Log in** if you already have an account.

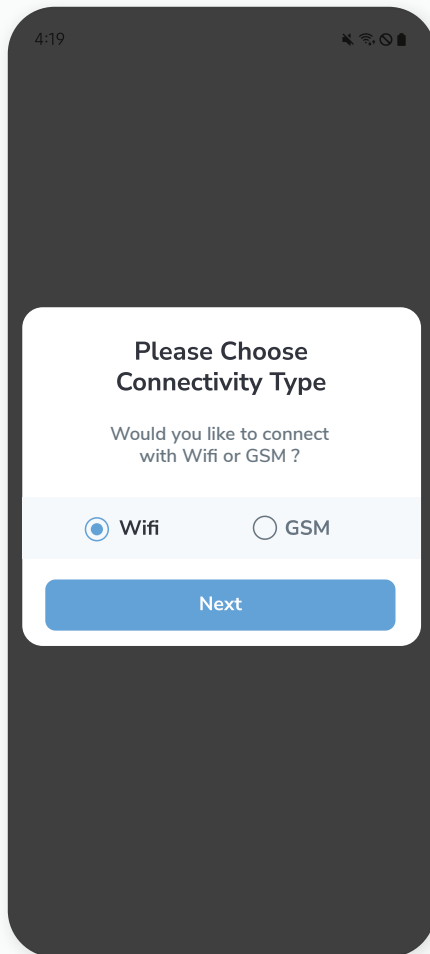

3 After successful login, Tap on **"Devices"** and then click on the **"Add Device"** button.

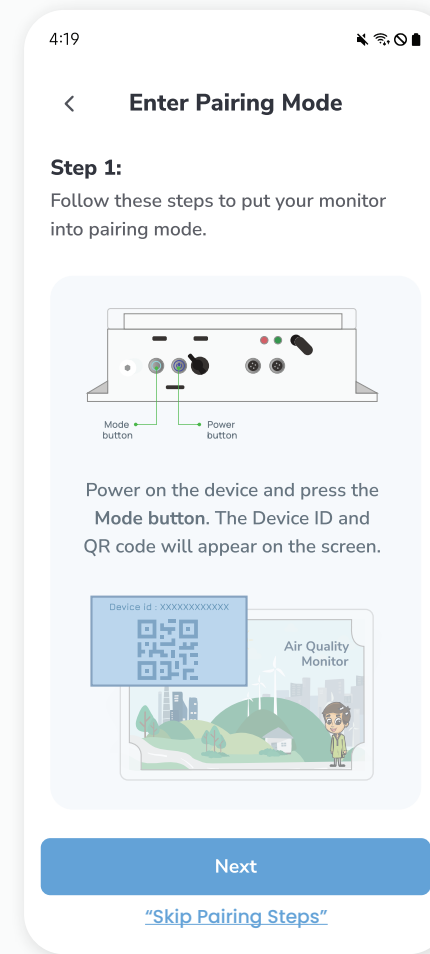

4 Then select **"Prana Sense"** in the **'Select your Device'** section

- 5 Select your preferred connectivity type for the monitor: **Wi-Fi** or **GSM**.

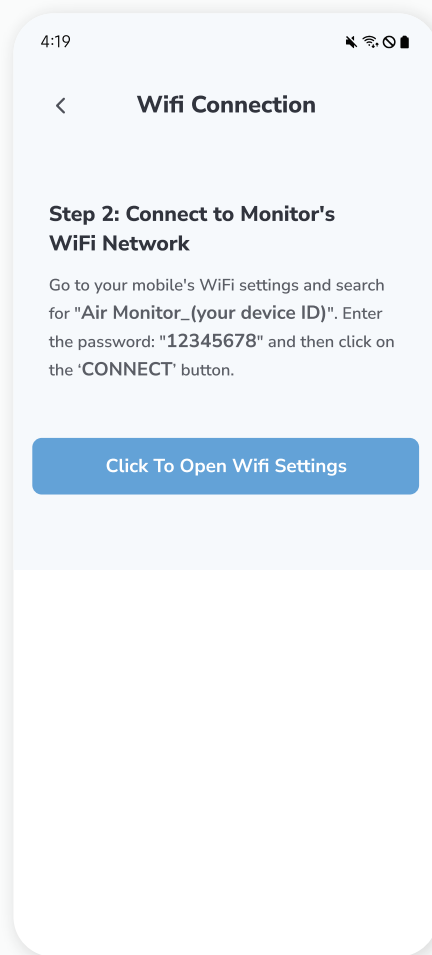

- 6 After selecting "Prana Sense", you will redirect to the pairing mode. It is to connect your device to the WiFi so press "Next".

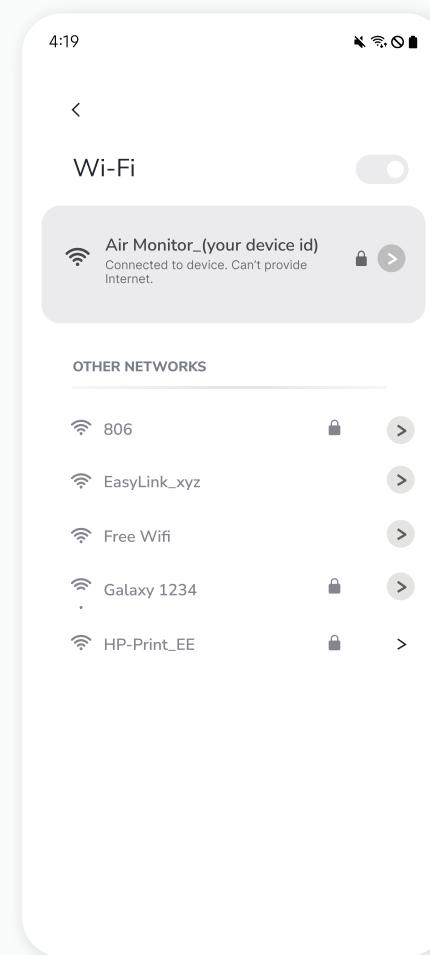

**NOTE:**  
If your device is already paired with Wi-Fi, you can choose ["Skip Pairing Steps"](#) to proceed directly to the device setup steps.

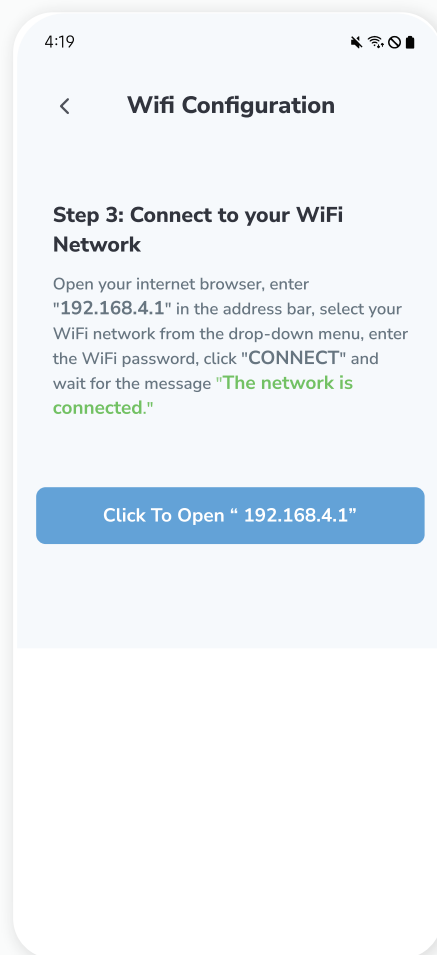

- 7 Select **"Click to Open Wi-Fi Settings,"** and it will take you to your Wi-Fi settings screen.

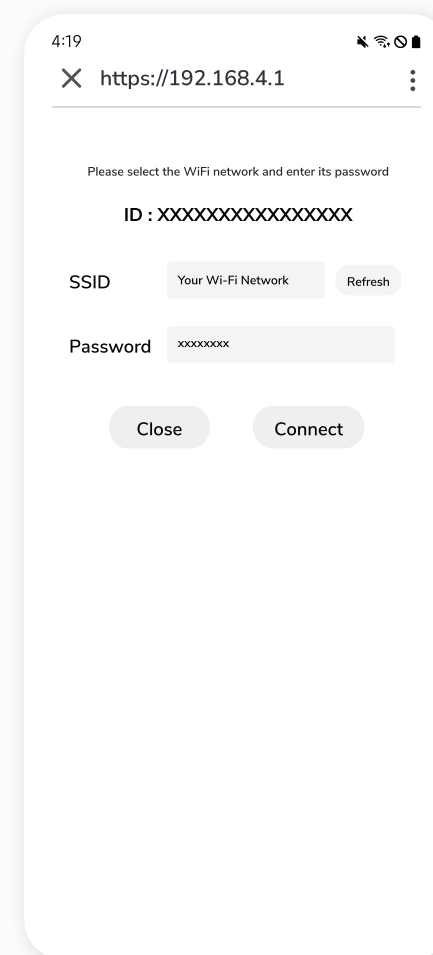

- 8 Next, search for **"Air Monitor\_(your device ID)"** in the available networks. Use **"12345678"** as the password to connect.

- 9 Afterward, return to the app and choose the option **“Click To Open '192.168.4.1.’”** This will launch the page in your internet browser.

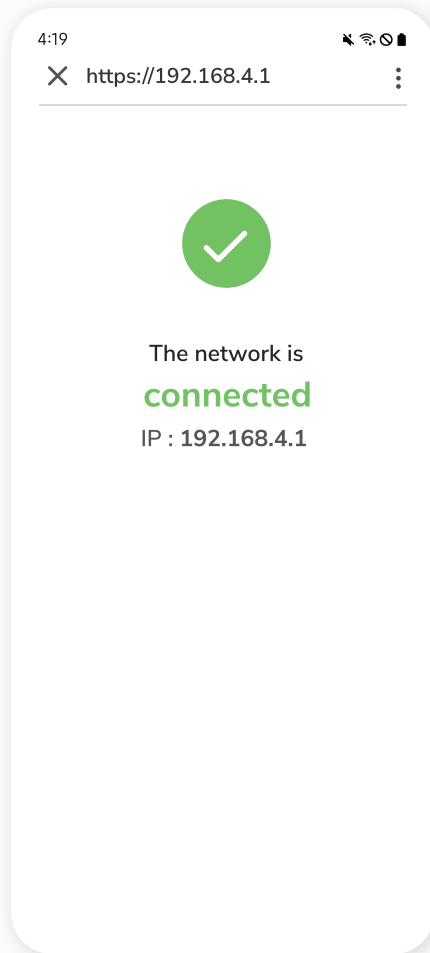

- 10 Then you'll be redirected to a page with **SSID and password**. In the SSID drop-down select your WiFi network that has a secured data connection and then enter the password of your WiFi connection. To connect click on **“connect”**.

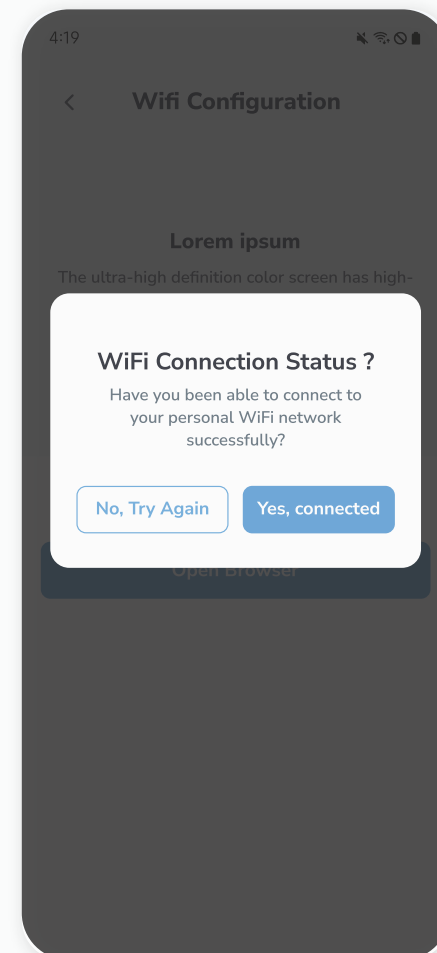

**NOTE:**  
Click the refresh button if your WiFi network is not showing.

- 11 After few seconds, A new pop-up window will appear that will display that the device is connecting. Wait till you see the message **"The network is connected"**.

- 12 Then open the app again in your smartphone. Then press **"Yes, connected"** if you been able to connect to your personal Wifi Network.

13

After successful connection, your Device ID will submit automatically. You can also check it and after filling it correctly click on **“Next”**.

- 15 Your device is added successfully. You can see your added device under the "My Devices" section of the AQI App. Check the device's online status after 5 minutes. If offline, verify the power source, and WiFi connection.

**NOTE:** Please ensure the device is successfully added to the AQI app and has established an online connection.

- 16 Click on your device card in "My Devices" to get a detailed view of the monitored data.

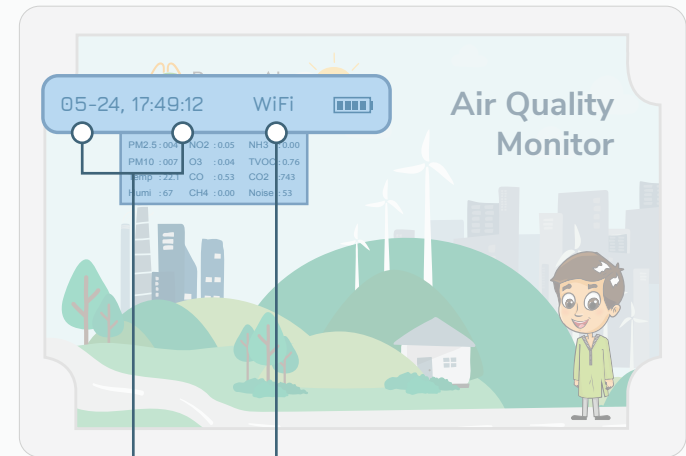

**NOTE:** The device will continue to display as online for 30 minutes even after going offline.

- 17 After completing all the steps and connecting the monitor to Wi-Fi, **restart** the device by pressing the power button.

- 18 When you return to the device, you will notice the **Current time & date and Wi-Fi** displayed at the top of the screen. If the **Wi-Fi** is not visible, it indicates there is no connection. Repeat the previous steps to ensure the network is properly established.

# How to connect device to Weather Station

---

Ensure uninterrupted weather data by connecting your device to the weather station. If a weather station isn't required, skip these steps

1 Connect the weather station wire to the designated port at the bottom of the air quality monitor.

2 Once connected, position the weather station in an appropriate location for accurate data collection.

# How to connect device to Solar panel

---

Run your monitor on solar energy by connecting it to a solar panel. Enjoy an eco-friendly, sustainable power solution.

- 1 Connect the solar panel wire to the port located at the bottom of the air quality monitor.

- 2 Position the solar panel at a 30-degree angle for perfect sunlight exposure to power the device.

# Safety Guide

---

To ensure safe and proper usage of this product, please refer to the following safety guide before operating the device.

- 1 Read and follow the user manual before using the device.
- 2 Avoid exposing the device to extremely high temperatures, and humidity. And Make sure to turn on the device properly.
- 3 To avoid damage, keep the device away from harmful liquids. It can damage the device.
- 4 Take appropriate precautions if you are aware of any potential hazards or risks related to the specific environment you are monitoring.
- 5 Preventive measures: If the gadget detects high levels of pollutants or other potentially hazardous substances, take precautionary measures such as opening windows or leaving the area.
- 6 When connecting to the wifi network and the AQI app, kindly read the instructions carefully.
- 7 It is important to only use Prana Air repair services to fix the device. If the air quality monitor is not functioning properly, do not attempt to repair it yourself.
- 8 Accessories: The user has the option to use an alternative adapter ( with the same power rating) and USB cable.
- 9 Store the air quality monitor in a cool, dry place when not in use. This will help prevent damage to the device and extend its lifespan. Do not drop, shake, or knock the device. Violent usage may damage the screen or the internal circuit.

# Service Guidelines

---

This section outlines the recommended maintenance procedures and service requirements for ensuring the optimal performance and longevity of the device.

## A. Warranty Terms

- 1 The device comes with 6 Months warranty against manufacturing defects.
- 2 A valid proof of purchase is required to be eligible for repairs or replacements.
- 3 Warranty will be void in case of physical damage.

## B. Sending and Retrieving the Device for Repair

- 1 The customer must provide the necessary information, such as name, contact number, and fault description, to complete the repair work order.
- 2 If payment is made by cheque, the device can only be retrieved after the cheque has cleared.

## C. Warranty Description

- 1 The warranty covers only the device and its accessories under normal usage. No warranty will be provided if the device is damaged due to any of the following reasons:
  - 1.1. Warranty period has expired.
  - 1.2. No valid proof of purchase is provided, or the purchase date is beyond the warranty period.
  - 1.3. The content on the valid proof of purchase is different from the actual product or has been altered.
  - 1.4. The device is damaged due to improper usage or maintenance.
  - 1.5. The device is damaged due to moisture, liquids, or falling, or has been repaired or disassembled by an unprofessional.
  - 1.6. Damages due to force majeure.
  - 1.7. Normal wear and tear of the device (such as outer cover, buttons, and screen).
- 2 Both national and international services can be availed only at Prana Air's office.
- 3 All replaced parts, components, and accessories during warranty services will be kept by the Prana Air service center.
